REPLY TO THE ATTENTION OF

August 16, 1994

John Bellcoff, Mayor
City of Madison
Third Street
Madison, IL 62060

Dear Mayor Bellcoff:

U.S. EPA has received the results of the four additional soil samples taken from the park located at 1201 Washington in Madison, Illinois. The original sample of concern, sample E, contained 484 parts per million (ppm) of lead in the 0-3 inch depth zone. Four additional samples (sample N - Northwest of sample E, sample P - NE, sample Q - SW, and sample R - SE) were collected around sample E to determine whether this area of the park exceeded U.S. EPA's cleanup level of 500 ppm lead for the NL Industries Site in Granite City. The results are listed below:

Depth Zone

0-3 inches
3-6 inches
6-12 inches

Depth Zone	Lead Concentration (ppm)			
	Sample N	Sample P	Sample Q	Sample R
0-3 inches	317	323	256	330
3-6 inches	420	253	283	343
6-12 inches	52	175	162	185

All results are below 500 ppm lead. If you have any questions, please call me at (312) 836-4742.

Sincerely,

Brad Bradley

Brad Bradley
